

Grid 50

Assembly and operating instructions

visplay

Assembly dimensions / Layout

! The fixation material and the wall must be capable of supporting a min. fraction weight of 180 kg.
 Please observe the indications concerning weight loading and ensure that the substructure of the wall units/furniture and their fixtures can support the expected loads.
 With free-standing furniture, ensure that there is sufficient stability even with the intended merchandise supports.

Weight loading

! The indicated weight loads are always based on the total weights of the merchandise support and goods.
 Please observe that max. weight loading decreases as the merchandise support increases in length.
 Please observe that the inclination of the merchandise support changes with an increase in load. Different weights on the merchandise supports produce an uneven overall appearance of the goods display.
 The max. weight loading of Grid 50 depends on the nature of the wall, on the number of fixation points as well as on the fixation material used.
 All fixation points are to be used with a maximum weight load.
 The fixtures must be selected according to the manufacturer's recommendations and the type of on-site masonry.
 Please also observe the weight loads indicated in our sales documentation.

Frame

The permissible weight load of all accessories: max. 200 kg.
 The weight load must be reduced as the height of the accessories increases.

Gondola

The permissible weight loading of all accessories: max. 120 kg (60 kg per side).
 Max. overhang is 400 mm.
 The weight load must be reduced as the height of the accessories increases.
